Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a solar powered distillation system, classified in class 202, subclass 234.
- II. Claim 22, drawn to a method of forming a solar powered distillation system, classified in class 126, subclass 714.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as: distillation system powered by electricity, by gas and etc., a solar powered absorber, reactor, scrubber, etc., or the apparatus as described by applicants e.g., at the paragraph bridging pages 1-2 of the specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and the search required for Group I is not required for Group II, and further because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 703-308-3844. The examiner can normally be reached on Tuesday-Friday; 7:30AM-6:00PM.
